WORK EXPERIENCES

JetCommerce

Data Engineer

Apr, 2025 - Present

Jakarta, Indonesia

- Built and automated end-to-end ETL pipelines (API scraping → cleaning/transformation → PostgreSQL) for daily ecommerce reporting.
- Designed relational data models and Django REST APIs powering a full-stack dashboard that replaced Looker.
- Standardized cross-brand reporting metrics and automated stakeholder data delivery; built a 40+ query reusable SQL library.
- Cut GCP cloud OPEX by >40% via BigQuery-to-PostgreSQL migration, Windows-to-Ubuntu server transition, and scheduled query optimization.

Xeratic

Jr. Data Engineer

Nov, 2023 - Jun, 2024

Remote, Indonesia

- Managed end-to-end data pipelines, including ETL processes, data warehousing, and automation to optimize data flow and integration.
- Developed interactive dashboards and reports using Tableau, transforming raw data into actionable insights.
- Monitored and maintained databases, enforcing data governance, integrity, and compliance standards.

PROJECTS

TickerWatch - Indonesian Stock Market Analysis Platform

[TickerWatch.site](https://www.tickerwatch.site)

Built and deployed a full-stack Flask SaaS platform for Indonesian stock market analysis, including custom data scraping, backend feature development, an interactive front-end dashboard, and production deployment via Gunicorn, Nginx, and systemd.

Cloud Data Pipeline (Amazon Web Services)

[GitHub Repository](#)

Built an AWS ETL pipeline using Glue, PySpark, and Airflow to automate data processing and orchestration.

Data Science Final Project Kalbe Nutritional X Rakamin

[Presentation PowerPoint](#)

Exploratory Data Analysis with PostgreSQL, Creating Tableau Dashboard and Predictive Modeling (Customer Segmentation with KMeans Clustering and Time Series Forecasting with ARIMA).

SKILLS

Programming Languages: Python (Pandas, PySpark, Django, Flask), SQL (PostgreSQL, BigQuery, MySQL, MS SQL Server, SQLite), Shell Scripting

Tools & Frameworks: Django REST Framework, Airflow, Kafka, Selenium, Requests, Git, Linux (Ubuntu) Server, Nginx, Gunicorn, systemd, Pentaho DI, Looker, Tableau, PowerBI, Jupyter, RDBMS, GCP, GCS, AWS, Spreadsheet

Languages: Indonesian (Native), English

EDUCATION & COURSES

IPB University

Aug, 2019 - Mar, 2025

Bachelor of Science in Physics, GPA 3.68/4.00

Relevant coursework: Algorithms and Programming, Statistical Methods, Computational Physics, Control System

- Utilized computing tools (MATLAB, Mathematica, and Python) and analytical thinking to tackle complex physics problems, developing innovative and creative solutions to advance research and understanding in the field.

DQLab

Apr, 2023 - Jun, 2023

TETRIS Bootcamp Program Batch 3: Data Analytics Scholarship Awardee

- Gained expertise in SQL, Python (pandas, numpy, matplotlib, seaborn), and Pentaho DI for ETL.
- Performed data manipulation, visualization, and exploratory analysis for data-driven storytelling.
- [Final Project](#): Analyzed e-commerce data using SQL and Python (EDA), then visualized insights and created a summary using Streamlit.

Courses:

ETL and Data Pipelines with Shell, Airflow, and Kafka by IBM

Nov, 2024

Programming with Python for Data Science by Cisco Networking Academy

Jun, 2023

Data Analysis with Python by IBM

Mar, 2023

Databases and SQL for Data Science with Python by IBM

Feb, 2023

Designing Database using Microsoft SQL Server by Coding Studio

Feb, 2023
